Refusing to side with either the Union or the Confederacy, Great Britain officially declared neutrality in the U.S. Civil War, thereby putting into effect the Foreign Enlistment Act, which forbade all belligerents to arm ships in her ports. Unofficially, many British citizens sympathized with the Confederacy because the Union's naval blockade stopped the flow of cotton from Southern fields to English textile mills. For this reason, the Confederate representative James Bulloch found British shipbuilders willing to fill his orders for battle-ready vessels without inquiring too closely into his intentions. The U.S. Consul in Liverpool, Thomas Haines Dudley, suspected Bulloch was commissioning warships for an assault on Union naval or commerce ships. Despite his lack of diplomatic experience--President Lincoln had appointed Dudley as a political favor--the consul committed himself to preventing vessels destined for the Confederacy from leaving the shipyards. Dudley hired private detectives, bribed workers, bought sworn affidavits, and provided room and board for turn-coat Confederate sailors willing to furnish evidence that could be used in court. Confronting innumerable political obstacles and even threats to his life, Dudley served his country faithfully and courageously. He achieved his greatest success years after the war's conclusion when in 1872 an international tribunal awarded the United States \$15 million in reparations for the British government's failure to enforce its own neutrality laws. This true account of Dudley's years of service sheds new light on a crucial diplomatic front of the American Civil War. American naval hero and Confederate secret agent James Dunwoody Bulloch was widely considered the Confederacy's most dangerous man in Europe. As head of the South's covert shipbuilding and logistics program overseas during the American Civil War, Bulloch acquired a staggering 49 warships, blockade runners, and tenders; built "invulnerable" ocean-going ironclads; sustained Confederate logistics; financed covert operations; and acted as the mastermind behind the destruction of 130 Union ships. Ironically, this man who conspired to destroy the Union and kidnap its president later stood as the favorite uncle and mentor to Theodore Roosevelt. Bulloch's astonishing life unfolds in this first-ever biography. Captain John Henry Otto was a keen observer; his memoirs paint a vivid picture of the life of a common soldier and of a line officer at the company level during the Civil War. The naval aviation safety review. Over the Beach, written by historian and retired Army Colonel Donald W. Boose Jr., is the definitive history of the extensive but little known US Army amphibious operations during the Korean War, 1950-1953. Building on its extensive experience in World War II, the Army conducted three major landing operations during the war, including the assault at Inchon in September 1950. After the massive Chinese attacks two months later the Army executed a series of amphibious withdrawals as it fell back to more defensible positions farther down the peninsula. Throughout the war the Army also conducted a number of massive and complex over-the-shore logistical operations, as well as several amphibious special operations along the Korean littoral. Colonel Boose's work, commissioned by DAMO-ODG, Operations and Technology Office, provides the historical context for any subsequent amphibious operations on the Korean peninsula. As such, this thought-provoking study may provide insights to modern planners crafting future joint or combined operations in that part of the world. -- Publisher's Description. "Jack" Northrop and the company he founded in 1939, Northrop Aircraft, Inc., will be forever linked with the giant futuristic Flying Wings of the 1940s. But those iconic designs were not the only ideas to spring from the mind of this pioneering visionary and the innovative engineers who followed him. Many piston-powered and turbojet concepts, both conventional and radical in shape and purpose, were proposed and developed over the company's proud fifty-five year history. This book unveils Northrop's once-secret radical designs, many for the first time, with never-before-published drawings, models, and photos of such novel concepts as a ship-based vertical take-off and landing fighter, a supersonic intercontinental cruise missile, a rocket-boosted jet spaceplane trainer, and a radical combination truck/aircraft/boat cargo vehicle. Much of this material has only recently been*

*declassified. Here for the first time is the untold story of Northrop's rare, unique, and formerly super-secret aircraft and spacecraft of the future. Featuring stunning original factory artwork, technical drawings, and never-before-seen photographs, this book shows an amazing array of radical high-performance aircraft concepts from Jack Northrop and his team of brilliant and innovative engineers. Looks at the Confederate strategy to destroy Union commerce and the Southern blockade. Preparing for Victory explains how and why Commandant Thomas Holcomb successfully supervised the dramatic expansion of the Marine Corps from 18,000 officers and men in 1936 to 385,000 in 1943. Not only did Holcomb leave the Corps much larger, but he also helped establish it as the United States' premier amphibious assault force and a major contributor to victory over Japan. Despite Holcomb's successes, he has been ignored or given short shrift in most histories of the Marine Corps. No book-length study of his commandancy exists until now. Drawing on a wide range of printed and archival sources, my book contends that Holcomb expertly guided the Corps' preparations for war during the last years of the Great Depression and then provided his "Leathernecks" with astute direction during the first harrowing twenty-five months of World War II. When measured with principles of organization theory and leadership studies, Holcomb's abilities and achievements match those of such outstanding American military managers as Dwight D. Eisenhower, Chester W. Nimitz, and George C. Marshall. Like these unassuming yet efficient officers, Holcomb shied away from the limelight and therefore never garnered the attention that "Chesty" Puller or "Howlin' Mad" Smith have. This book fills a void and tells the story of one of the key leaders in World War II. More than any other marine, Holcomb molded his Corps into the modern force-in-readiness that would eventually help fight the Cold War and the Global War on Terror.*
